

Product Information

AQUACULTURE TANKS

6 Compartment 900 gallon Transport Tank

Custom built transport tank was built with a wood skeleton and foam insulation then covered with fiberglass. The tank was built with an air manifold distribution system to a stone diffuser in each compartment.

FRP 420 Gallon Aquarium Tank

This is one of several "show" Tanks that Empire Fibreglass Products built for this State of Vermont Visitors Center display area. These custom built balsa core tanks are fitted with air inlet ports and support legs that can raise them to a set height.

2 Compartment 230 gallon Transport Tank

This is our standard FRP Balsa Core constructed Transport Tank. This is the tank that gets loaded on & off pickup trucks for back woods stocking. This rugged little tank is the work horse for many state hatcheries.

The tank is equipped with 2 aerators, a 6" quick disconnect, an interior baffle with a slide gate and a sloped bottom. Bottom sleepers lend to easy loading.
